

Minh Triet Pham

Melbourne, VIC | minhtrietmt3@gmail.com | [linkedin/in/minhtrietp](https://www.linkedin.com/in/minhtrietp) | [github/minhtrietcancode](https://github.com/minhtrietcancode) | minhtrietp.portfolio

EDUCATION

The University of Melbourne

Melbourne, Australia

Bachelor of Science in Data Science, First Class Honours (Top 5%)

Expected Nov. 2026

- **Coursework** (*current): Databases, Elements of Data Processing, Data Structures and Algorithms, Object-Oriented Programming, Probability, *Statistics, Linear Algebra

EXPERIENCE

Elcom

May 2025 - Jul. 2025

AI Engineer Intern (Computer Vision)

Hybrid

- Processed 1,000,000+ images for training computer vision models achieving high-performance detection accuracy
- Developed automated license plate recognition system detecting car numbers and attributes for 100,000+ vehicle images in high-speed road systems using YOLO and TensorFlow
- Implemented face recognition model for automated attendance checking system using OpenCV
- Crawled and curated 1,000,000+ images from diverse sources to build comprehensive training datasets for CV models

FutureTrack

Jan. 2025 – Apr. 2025

Data Analyst & Front-End Developer

Melbourne, Australia

- Predicted market size trends with 90% accuracy by implementing machine learning models using Scikit-learn
- Scraped 150+ websites for information on 40+ academic majors by utilizing BeautifulSoup
- Built responsive career guidance website serving 200+ students by developing with HTML/CSS/JavaScript
- Created comprehensive visualizations for 40+ majors by designing data-driven graphics with Matplotlib

PROJECTS

AI-Powered LinkedIn Talent Search Agent | [Link](#) | Python, LangChain, OpenAI API, Selenium, BeautifulSoup

- Automated job description analysis extracting 10+ key requirements with 95% precision using LangChain
- Implemented intelligent LinkedIn search discovering 100+ relevant candidates based on JD summaries using Selenium web automation
- Developed smart chunking algorithm processing LinkedIn profiles by structure achieving 90% data extraction accuracy using BeautifulSoup
- Built LLM-powered matching system ranking top 5 candidates with 85% relevance score using LangChain and OpenAI API

Intelligent Resume Analytics Platform | [Link](#) | Python, EasyOCR, FAISS, Claude API

- Engineered RAG-powered resume analysis system processing 1,000+ documents with 90% contextual accuracy using Claude API
- Implemented vector embeddings and semantic search achieving 0.8 similarity score using FAISS
- Developed LLM-integrated web dashboard providing real-time resume insights with 3-second query response
- Created multi-modal document processing pipeline supporting 5+ file formats with 95% text extraction accuracy

Australian Accident Investigation | [Link](#) | Python, Pandas, Matplotlib, Scikit-learn, Seaborn, NLTK

- Structured and cleaned 500,000+ accident records achieving 95% data integrity using Pandas and regex
- Built predictive risk models identifying 3 critical accident factors using Scikit-learn correlation analysis
- Generated comprehensive reports with data visualizations using Seaborn and Matplotlib for safety recommendations
- Analyzed text patterns in accident descriptions using NLTK BoW analysis to identify high-risk scenarios

HONORS & AWARDS

Melbourne International Undergraduate Scholarship | The University of Melbourne

May 2023

Meritorious Prize | International Mathematical Modeling Challenge

Jul. 2022

High Distinction | Australian Intermediate Mathematics Olympiad

Sep. 2021

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (MySQL), HTML/CSS/Javascript

Developer Tools: Git (GitHub/GitLab), VS Code, Visual Studio, PyCharm, IntelliJ, Jupyter Notebook

Libraries: PyTorch, TensorFlow, OpenCV, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK, BeautifulSoup
