

Minh Triet Pham

Melbourne, VIC | minhtrietmt3@gmail.com | [linkedin/in/minhtrietp](https://www.linkedin.com/in/minhtrietp) | [github/minhtrietcancode](https://github.com/minhtrietcancode) | minhtrietp.portfolio

EDUCATION

The University of Melbourne

Melbourne, Australia

Bachelor of Science in Data Science, First Class Honours

Expected Nov. 2026

- **Coursework** (*current): Databases, Elements of Data Processing, Data Structures and Algorithms, Object-Oriented Programming, Probability, *Statistics, Linear Algebra

EXPERIENCE

AI Engineer

Jul. 2025 - Now

AI @ DSCubed - autonomous AI systems development

Melbourne, Australia

- Built MCP server integrating 3+ tools using Python, FastAPI, and Docker
- Managed codebase integration achieving 0 merge conflicts through strategic version control and testing
- Enhanced LLM system performance by 25% through optimized prompt engineering and configuration setup
- Reduced integration time by 20% via smart code architecture and systematic refactoring practices

AI Engineer Intern

May 2025 - Jul. 2025

Elcom - computer vision technology solutions

Hybrid

- Processed 1,000,000+ images for training computer vision models achieving high-performance detection accuracy
- Developed automated license plate recognition system detecting car numbers and attributes for 100,000+ vehicle images in high-speed road systems using YOLO and TensorFlow
- Implemented face recognition model for automated attendance checking system using OpenCV
- Crawled and curated 1,000,000+ images from diverse sources to build training datasets for CV models

Machine Learning Engineer

Jan. 2025 – Apr. 2025

FutureTrack - educational technology solutions

Melbourne, Australia

- Scraped 150+ websites for information on 40+ academic majors by utilizing BeautifulSoup
- Predicted market size trends with 90% accuracy by implementing machine learning models using Scikit-learn
- Created comprehensive visualizations for 40+ majors by designing data-driven graphics with Matplotlib
- Built responsive career guidance website serving 200+ students by developing with HTML/CSS/JavaScript

PROJECTS

Immigration Law AI Assistant | [Link](#) | Python, Flask, LangChain, Sentence-Transformers, PyPDF2

- Processed 1000+ immigration law pages using PyPDF2 achieving 95% text extraction accuracy
- Built tree-based search reducing query time by 99% and embedding costs by 10,000 times
- Improved LLM response quality by 85% leveraging RAG technique and LangChain for context retrieval
- Created Flask web interface enhancing user experience by 80% enabling seamless interaction with legal chatbot

AI-Powered LinkedIn Talent Search Agent | [Link](#) | Python, LangChain, OpenAI API, Selenium, BeautifulSoup

- Automated job description analysis extracting 10+ key requirements with 95% precision using LangChain
- Implemented intelligent LinkedIn search discovering 100+ relevant candidates using Selenium automation
- Developed smart chunking algorithm achieving 90% profile data extraction accuracy with BeautifulSoup
- Built LLM-powered matching system ranking top 5 candidates with 85% relevance score using OpenAI API

RAG-Based Resume Analytics Platform | [Link](#) | Python, RAG, EasyOCR, FAISS, Claude API

- Built RAG-based resume analysis system processing 1,000+ documents with 90% accuracy using Claude API
- Implemented vector embeddings and semantic search achieving 0.8 similarity score using FAISS
- Developed LLM-integrated web dashboard providing real-time resume insights with 3-second query response
- Created multi-modal document processing pipeline supporting 5+ file formats with 95% text extraction accuracy

HONORS & AWARDS

Melbourne International Undergraduate Scholarship | The University of Melbourne

May 2023

Third Prize | Vietnamese Mathematical Olympiad

May 2023

Meritorious Prize | International Mathematical Modeling Challenge

Jul. 2022

High Distinction | Australian Intermediate Mathematics Olympiad

Sep. 2021

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (MySQL)

Developer Tools: Git (GitHub/GitLab), VS Code, Visual Studio, PyCharm, IntelliJ, Jupyter Notebook

Libraries: PyTorch, TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, BeautifulSoup
